HENRY COUNTY **PUBLIC SERVICE AUTHORITY**

Management Discussion & Analysis

The mission of the Henry County Public Service Authority is to provide safe, high-quality drinking water and sewer services to its customers in an open, honest, and efficient manner and to be good stewards of the resources provided to us.

Often, our employees go about their work day – withdrawing water from the river, treating it to make it safe for drinking, and finally, delivering it to our community via 385 miles of pipe using a complex system of tanks and pumps. This repetitive process ensures our community has quality drinking water and that our businesses and industries have the water necessary for their operation. Rarely does the end user ever consider where this water comes from or what is involved in getting it to the spigot.

Simultaneously, 244 miles of sewer lines silently work beneath our feet, ensuring the swift and efficient removal of wastewater and safeguarding our environment and public health.

Additionally, our rural roadways are peppered with 1,732 fire hydrants, often unnoticed but crucial to our safety. These silent sentinels stand ready to spring into action at a moment's notice, fortifying our defenses against the threat of fire and preserving the safety of our homes and businesses. Through regular maintenance and testing, the PSA ensures that each hydrant remains in peak condition, ready to deliver a crucial lifeline in times of need.

Embedded within the fabric of the PSA is a team of dedicated individuals whose unwavering commitment and tireless efforts form the backbone of our operations. From the skilled technicians who maintain our vast network of water and sewer lines to the administrative staff who ensure the seamless coordination of our services, our workforce is the heart and soul of the PSA.

Each day, rain or shine, our employees traverse the length and breadth of our county, braving rugged terrain and inclement weather to ensure the uninterrupted flow of clean water and the efficient management of wastewater. Their expertise and professionalism are matched only by their passion for service, as they

tirelessly strive to meet the needs of our residents and uphold the highest standards of quality and reliability.

We recognize that the strength of the PSA lies not only in the infrastructure we maintain but also in the dedication and expertise of our workforce. In the pages that follow, we affirm our commitment to investing in our workforce – knowing that they are the driving force behind our continued success and the guardians of our community’s prosperity.

As stewards of these vital resources, the PSA remains steadfast in its mission to provide safe, high-quality drinking water and sewer services in an open, honest, and efficient manner to our community. In the pages that follow, we outline our budgetary priorities to ensure the continued prosperity and well-being of the community. From infrastructure improvements to workforce development, every dollar allocated is an investment in the resilience and vitality of our community.

Before diving into the details of the proposed budget, let’s take a look back at a few highlights of the past year.

[FY 2023-24 Highlights](#)

The new fiscal year began with the wonderful news that Press Glass would expand its operations in the Commonwealth Crossing Business Centre (CCBC), creating 355 new jobs and investing \$155 million in new capital. The expansion will more than double the size of the facility and the number of jobs. Press Glass currently has more than 300 workers at its CCBC location.

The environmental permits for site work on Lot #2 at CCBC have been granted by the Virginia Department of Environmental Quality and the United States Army Corps of Engineers. This clears the way for grading that will create a new 150-acre pad for development. As part of this project, the sewer line in the park will be extended, eliminating the need for a booster pump station.

Staff implemented a Computerized Maintenance Management System and Asset Management Plan using the Utility Cloud platform.

A comprehensive compensation and employee classification study was completed. The study provided recommendations for revised job titles and descriptions, as well as data to support market-competitive compensation. The plan was implemented on December 1. This effort could not have been accomplished without the diligent work of Human Resources Director Michelle Via and Human Resources Specialist Marybeth Deadmond.

Our community celebrated the opening of the School Drive Apartments, which created 39 modern apartments for workforce housing. This project is an excellent example of a public-private partnership to leverage outside resources. This project is part of a broader effort known as the Historic Collective that will create more than 200 apartments in Martinsville-Henry County.

The PSA was successful in securing a competitive grant of \$6,165,600 from the Virginia Department of Health for the replacement of lead service lines in Fieldale. The grant covers 100% of the expenses and does not require any local matching funds. Additionally, the PSA has embarked on developing an inventory of lead service lines that are in contact with PSA drinking water in the remaining service area. Lead service lines were generally installed before 1987 and are on the customer's side of the meter. The PSA secured additional grant funds of \$250,000 to cover the costs of developing the inventory. Once the inventory is complete, the PSA will seek grants and other opportunities to assist residents with replacing their lead lines.

The PSA received an 80% grant from the United States Economic Development Administration (EDA) to extend the sewer line on Route 58 West. The total cost of the project is \$1,200,000.

Staff worked with the owner of Sherwood Manor Apartments in Bassett to convert the 66-unit facility from a well system to PSA water services.

The PSA received a grant of \$547,575 to purchase generators for the Oak Level and 10th Street water booster pump stations, and a grant of \$121,275 to purchase a generator for the Rangeley sewer lift station.

The Board greenlit the Villa Heights sewer line replacement project, which will cost \$5,970,100. The loan amount is \$5,671,595 after \$298,505 principal forgiveness. This is a 30-year loan at 0.5% interest with an annual payment of \$203,626. Engineering and design are underway, and construction will start soon.

Our Information Technology team partnered with the United States Department of Homeland Security's Cybersecurity Infrastructure Security Agency (CISA) to perform a cybersecurity audit with the goal of identifying and correcting any weaknesses within our computer networks and email systems.

The PSA received a \$50,000 grant from the Southeast Rural Community Assistance Project, Inc. (SERCAP) to assist with sewer inflow and infiltration issues in the Kohler sewer system.

In response to a demonstrated community need, the PSA applied for grant funding for water line projects in the Horsepasture-Price Road and Stoney Mountain Road areas. Unfortunately, neither of the grants was selected for funding. Staff is strengthening the application and will reapply this year. In addition, PSA Staff is preparing grant applications for water line projects on Rock Hill Road, Fairmont Drive, and Pond Road.

In addition, a formal appropriation request has been submitted to the United States Senate's Congressional Directed Spending Program, asking for funding for the Stoney Mountain Road water project. Random well sampling within the project area indicated that 57% of the wells tested were positive for total coliform contamination. We need the assistance of our federal and state partners to make this \$9.9 million project a reality for the residents in dire need of clean water.

These positive milestones in 2023-2024 will complement the positive trajectory of our PSA in 2024-2025.

Proposed FY 2024-2025 PSA Budget

The proposed FY25 proposed budget is \$14,213,671, which includes \$3,938,707 in capital improvements and debt service. This is \$814,077 less than the FY24 budget, a 5% reduction. The operations portion of the budget is \$10,274,964.

The budget suggests no changes to the rates charged to customers. Currently, the PSA charges residential users \$30 a month and non-residential users \$45 a month, both based on 4,000 gallons/month. Institutional users are charged \$68.50 a month based on 6,000 gallons/month.

The reduction in the overall budget is attributable to fewer capital expenditures and less debt service. The PSA proactively paid off a Series 21A loan in FY24, which reduced our total debt service for this year.

The proposed budget includes \$1,936,407 for total debt service in FY25. The budgeted net revenues exceed the required debt coverage ratio (1.4) by \$394,148.

Revenue generated from the interest on the fund balance is projected to rise by 24.8%. Other revenues are generally flat. The PSA has experienced some growth in water and sewer sales since last year, but it is projected to hold steady in the upcoming year.

The most significant new expenditures in the budget are primarily for capital items and escalating costs for personnel, supplies, electricity, and fuel.

The following are notable changes in expenditures:

- It is anticipated that the cost to repair and maintain vehicles will increase by 5.5%.
- The budget projects a 10.2% increase in the cost of chemicals used in water and sewer treatment processes.
- The price of electricity continues to escalate much faster than inflation. The budget projects that our electricity costs will increase by 11.2% next year.
- To stay abreast of the latest developments with regulatory matters and best practices, it is important for the PSA to be a part of associations with

similar missions and purposes. Dues and Association fees are expected to increase by 7.8%.

- With the implementation of the compensation study and a modest cost-of-living increase for employees, salary line items are increasing by 8.7% across all cost centers. The next section provides more details about personnel-related changes.

Investment in our Workforce

The Public Service Authority recognizes that its most precious asset is its personnel. The PSA team has exemplified remarkable resilience and unwavering commitment despite the many challenges. Even in a swiftly adjusting work environment, these dedicated employees have steadfastly served their community, ensuring the seamless provision of vital water and sewer services.

In the current year, the Board greenlit the allocation of funds required to kickstart the implementation of a compensation study, positioning employee pay competitively within the market. Changes were implemented on December 1. The lengthy and complex process involved performing a market analysis, updating job descriptions, implementing regular performance evaluations, and assigning every employee to a grade and step on the compensation table. The Human Resources Department, under the leadership of Director Michelle Via, is commended for its tremendous work in managing this effort.

It is also good to report stability in the workforce. Currently, there is only one vacancy out of the 61 full-time positions allowed.

It has been the practice of the PSA to mirror what the County does when making compensation decisions. For this reason, this budget provides a three-percent (3%) pay increase for all employees on July 1. In addition, it contains a merit-based step increase for many employees, payable on September 1.

The Virginia Retirement System has mandated changes to the employer match portion of the employee's retirement fund, which resulted in increases in these

line items. This unfunded mandate adds approximately \$13,639 in expenses to the budget, constituting a 5.4% increase in overall retirement contribution costs.

The PSA remains committed to providing free health insurance to its employees. This valuable benefit sets us apart, as few other employers in the country can offer such comprehensive coverage. Working closely with the County and Henry County Public Schools, we're excited to announce that the cost of health insurance for spouse and family coverage is being reduced by 10%. This proactive step not only eases the burden on our employees with families but also enhances our ability to recruit and retain dedicated staff members across both the PSA and the County. Additionally, it has no impact on the operating budget. (Note: The PSA piggybacks on the Henry County Public Schools insurance in order to get the benefit of a large pool of participants, ultimately saving money for the Schools, County, and the PSA.)

Capital Improvements

The proposed budget recommends funding for the following capital improvement items:

- Replacement of Two Service Vehicles for Construction & Maint. - \$130,000
- Leatherwood Well System Rehabilitation - \$20,000
- Crash Cushion Safety Barrier for Construction & Maintenance - \$35,500
- Replacement Vehicle for Engineering & Mapping - \$35,000
- Meter Replacements - \$120,000
- Water System Rehabilitation - \$545,000
- Water and Sewer Replacement Program - \$300,000
- Replacement G.P.S. Equipment for Engineering Department - \$15,000
- Replacement Computers - \$12,000
- Right-of-Way Equipment - \$25,000
- Sewer Air Release Valve Replacements - \$65,000
- Process Equipment (Valves, Pumps, etc.) - \$75,000
- Rehabilitation of Various Buildings for Treatment Maint. - \$200,000

- Maintenance on Water Tanks - \$135,000
- Vehicle Replacement for Treatment - \$45,000
- Generator - \$160,000
- 57W Booster Pump Upgrade – 40,000

Additional information about the recommended capital improvements is provided later in the budget document.

On the Horizon

Over the next 24 months, a tremendous amount of staff time will be committed to overseeing the grading of Lot #2 at Commonwealth Crossing Business Centre. A key component of the grading from the PSA perspective is that it will also include extending the water and sewer services directly to Lot #2. It will also facilitate the conversion of a force main line to a gravity sewer line, which will ultimately be easier to maintain in the future.

In addition, work will begin on sewer projects in Villa Heights and Carver Road, as well as water projects in Fieldale and Hillcrest Park.

The City of Martinsville's lawsuit against the PSA still resides in the Martinsville Circuit Court. The case was once set to be heard in September but was recently rescheduled until December. The PSA stands ready to defend its position if necessary.

While this budget does not recommend any changes in user fees, it is also incumbent upon us to note that it includes funding for a rate study. The PSA has held rates steady for eleven years, even lowering rates for our very large-volume customers. However, sustaining this approach indefinitely is becoming increasingly challenging. The ongoing escalation in costs related to labor, electricity, chemicals, and materials necessary for water and sewer treatment and distribution will inevitably require adjustments to rates by July 2025.

Conclusion

This narrative began by discussing how what we do aligns with our mission statement. The photo on the cover of this document represents our commitment to keeping the promise of our mission statement - today. Soon, the new tank on Elf Trail will be filled with 500,000 gallons of water. This additional storage will improve water flows from Sanville all the way to Commonwealth Crossing Business Centre. It also improves our redundancy in the southern part of the County.

Bottomline: The proposed budget keeps rates low and maintains a consistent level of services for our community while considering our customers' ability to handle a rate increase at this time.

I conclude by acknowledging the tremendous work carried out by our team, not only in crafting this budget document but also in delivering crucial services to our customers. Our employees serve as the eyes and ears of our organization, providing a vital link to assess community needs and determine resource allocation. Despite challenges such as turnover and increased responsibilities, the team consistently ensures that we fulfill our mission to the customers and our community. I am deeply grateful to everyone who played a role in orchestrating this proposed budget.

TOTAL PROJECT COST <div style="border: 1px solid black; padding: 2px; text-align: center;">\$145,000</div>	EXPENDITURES TO DATE <div style="border: 1px solid black; padding: 2px; text-align: center;">\$0</div>	REMAINING BALANCE <div style="border: 1px solid black; padding: 2px; text-align: center;">\$145,000</div>			
RECOMMENDED FOR FIVE-YEAR PERIOD					
24/25	25/26	26/27	27/28	28/29	OVER 5 YEARS
			\$145,000		
DESCRIPTION / OBJECTIVES <div style="border: 1px solid black; padding: 5px; min-height: 400px;">The purpose of this capital expenditure will be to replace two existing rubber tire backhoes.</div>			GRAPHIC <div style="border: 1px solid black; padding: 5px; min-height: 400px;">The existing JCB backhoe is over 20 years old with recurring mechanical issues. Note: Staff are using mini-excavators more now for day-to-day work, therefore we are moving this request back several years. We have removed one capital expenditure for a second back hoe at this time, since a third mini-excavator was procured in the 21/22 capital budget. Recommend purchasing a smaller back hoe this time (214 size instead of 314 we currently have) as this will be more useful on certain job sites.</div>		
PROJECT STATUS COMMENTS <div style="border: 1px solid black; height: 80px;"></div>			RECOMMENDED SOURCE OF FUNDING <div style="border: 1px solid black; padding: 2px;">Capital Fund</div> IMPACT ON ANNUAL OPERATION COSTS <div style="border: 1px solid black; height: 40px;"></div>

DESCRIPTION / OBJECTIVES <p>PSA board approved and appropriated \$90,000 to install a fixed base system at Ferndale tank site in 2020. Since then, staff coordinated and worked with Sensus to identify additional sites that would improve data collection efficiency.</p> <p>Sensus has identified approximately 3,000 older meters that can't be programmed to take full advantage of the fixed base system. They can be used during the initial phase for bill. This issue will be addressed in Phase II of the project.</p> <p>Project put on hold due to supply chain issues and new Sensus vendor.</p>	GRAPHIC <p>Adding the two proposed sites to the fixed base system will allow the PSA to gather meter data remotely from more than 10,000 of the 13,000 existing units, which is 77% of water customers.</p> <table style="width:100%;"> <tr> <td colspan="2">Phase I</td> </tr> <tr> <td>57W Site</td> <td align="right">\$95,000</td> </tr> <tr> <td>Pine Valley</td> <td align="right">\$95,000</td> </tr> <tr> <td colspan="2">Phase II</td> </tr> <tr> <td>Incompatible Meters</td> <td align="right">\$150,000 FY 25/26</td> </tr> <tr> <td></td> <td align="right">\$150,000 FY 26/27</td> </tr> </table> <p>Additional sites can be added in the future to read 99% of meters throughout the system.</p>	Phase I		57W Site	\$95,000	Pine Valley	\$95,000	Phase II		Incompatible Meters	\$150,000 FY 25/26		\$150,000 FY 26/27

DESCRIPTION / OBJECTIVES			GRAPHIC								
<p>The PSA owns and operates over 243 miles of sewer line and 375 miles of water line covering close to a 110 square mile area.</p> <p>There are a number of plans dependent upon such as the replacement of ARVs, repair and rehabilitate manholes, repair of water and sewer lines and performing I&I studies, just to mention a few, that require having the right of ways cleared and is an essential part of operating a utility.</p> <p>Progress has been made even with a couple of set backs. As of December 2023, staff has cleared a total 53,668 linear feet (10.2 miles or 4.2% of the entire sewer system).</p> <p>A 6x6 side by sideall terrain vehicle would be beneficial and save time for staff by allowing access to areas being cleared that can not be accessed by truck on a daily basis.</p>			<table border="1" style="width:100%; border-collapse: collapse;"> <tr> <td style="width:10%;">FY25</td> <td style="width:70%;">Side by Side</td> <td style="width:20%; text-align: right;">\$25,000</td> </tr> <tr> <td>FY26</td> <td>New Tandem Axle Dump Truck</td> <td style="text-align: right;">\$150,000</td> </tr> </table>			FY25	Side by Side	\$25,000	FY26	New Tandem Axle Dump Truck	\$150,000

<p>DESCRIPTION / OBJECTIVES</p> <p>Air release valves (ARVs) are required on certain portions of a sewer. ARVs help release corrosive sewer gasses from the force main. These gasses can cause corrosion and deterioration of the sewer main and other assets of the sewer pumping system. In addition, when gasses and vacuum are not released from within the force main, there can be significant decreases in pumping efficiencies.</p> <p>Many of our ARVs have never been inspected or maintained since they were originally installed. With the normal life expectancy being 15-20 years, many of them are double in age of this and are expected to not be functioning at all.</p> <p>The largest issue is going to be access to these valves since many of the access is now in wooded areas. The right of ways will need to be cleared to access for maintenance or replacement.</p> <p>*Prior to the Edgewood FM valves being replaced, there is significant concern about the integrity of the forcemain its self. A condition evaluation of the line should be conducted first.</p>	<p>GRAPHIC</p> <table style="width:100%;"> <tr> <td>FY25</td> <td>Edgewood ARV Replacement 12 Each</td> <td align="right">\$65,000</td> </tr> <tr> <td>FY26</td> <td>Eastwood ARV Replacement 5 Each</td> <td align="right">\$30,000</td> </tr> <tr> <td>FY27</td> <td>Leatherwood ARV Replacement 7 Each</td> <td align="right">\$40,000</td> </tr> <tr> <td>FY28</td> <td>Rangeley ARV Replacement 2 Each</td> <td align="right">\$12,000</td> </tr> <tr> <td>FY29</td> <td>Bassett ARV Replacement 5 Each</td> <td align="right">\$25,000</td> </tr> </table>	FY25	Edgewood ARV Replacement 12 Each	\$65,000	FY26	Eastwood ARV Replacement 5 Each	\$30,000	FY27	Leatherwood ARV Replacement 7 Each	\$40,000	FY28	Rangeley ARV Replacement 2 Each	\$12,000	FY29	Bassett ARV Replacement 5 Each	\$25,000

<p>DESCRIPTION / OBJECTIVES</p> <p>Most sanitary sewer systems have some amount of Inflow and Infiltration (I&I). The PSA has known of I&I issues for a while, however, the issues have become more evident recently as well as staff beginning to see capacity issues with the Koehler EQ basins during storm events.</p> <p>The I&I in the Koehler system has increased by 15% immediately after the events of May 2020 and staff has not been able to identify the sources. This doesn't even account for the preexisting I&I issues throughout all of the PSA's sewer systems. The PSA pays the City directly for all I&I along with sewer.</p> <p>Staff recommends conducting a system wide flow study that would identify areas with the most I&I as "low hanging fruit" that would be easiest to reduce.</p> <p>This would be followed by field investigation and then engineering and design for rehab to correct issues.</p> <p>Staff will continue with ROW & investigation work and make repairs as discovered.</p>	<p>GRAPHIC</p> <table style="width:100%;"> <tr> <td style="width:40%;">FY 26</td> <td style="width:40%;">*Phase II B - Rank Sub-basins, CCTV Field Investigations Manhole Inspections GIS all Data</td> <td style="width:20%; text-align: right;">\$250,000</td> </tr> <tr> <td>FY 27</td> <td>*Phase III - Engineering & Design Construction</td> <td style="text-align: right;">\$1,500,000</td> </tr> </table> <p>*Applying for DEQ loan/grant funding 2023-2024</p>	FY 26	*Phase II B - Rank Sub-basins, CCTV Field Investigations Manhole Inspections GIS all Data	\$250,000	FY 27	*Phase III - Engineering & Design Construction	\$1,500,000

DESCRIPTION / OBJECTIVES <p>The PSA has been experiencing an increasing amount of water loss/non-revenue water since 2016 with a peak loss around the summer of 2019.</p> <p>Based on FY20 Water Audit there were \$236,000 in real and apparent losses. In FY21 there was 1.076 billion gallons of finished water produced with 719 million gallons either sold or otherwise accounted for leaving 357 million gallons of Non-Revenue water.</p> <p>As an effort to improve efficiency within the organization, it is a top priority for the PSA to identify and correct losses within the PSA water system. The Utilis program has been a beneficial way for staff to systematically search for potential leaks much easier and quicker than by randomly searching the 374 miles of water line the PSA owns.</p> <p>In addition, through assistance from Cavanaugh, Inc. staff is beginning to learn areas where attention should be focused for apparent and real losses.</p>	GRAPHIC <table style="width:100%;"> <tr> <td style="width:10%;">FY26</td> <td style="width:80%;">Utilis 3rd Fly-Over</td> <td style="width:10%; text-align: right;">\$70,000</td> </tr> <tr> <td>FY27</td> <td>Cavanaugh Water Audit</td> <td style="text-align: right;">\$40,000</td> </tr> <tr> <td>FY28</td> <td>Utilis 4rd Fly-Over</td> <td style="text-align: right;">\$70,000</td> </tr> <tr> <td></td> <td>Cavanaugh Water Audit</td> <td style="text-align: right;">\$15,000</td> </tr> </table>	FY26	Utilis 3rd Fly-Over	\$70,000	FY27	Cavanaugh Water Audit	\$40,000	FY28	Utilis 4rd Fly-Over	\$70,000		Cavanaugh Water Audit	\$15,000

DESCRIPTION / OBJECTIVES <div style="border: 1px solid black; padding: 5px; min-height: 300px;"><p>Zone metering consists of specific water meters in strategic locations within our Philpott Water System. Zone metering can be an important tool in optimizing water usage, losses and the tracking of leaks.</p><p>Staff has determined that the major Pressure Reducing Valves (PRVs) should be the location of most of our zone metering. Staff has researched a number of options to use. Staff believes that using Sensus meters with radio read equipment matching existing metering or ultimately MXUs that can communicate with our future towers if approved would be our best option.</p></div>			GRAPHIC <div style="border: 1px solid black; padding: 5px; min-height: 300px;"><p>Phase III (FY26) - \$100,000</p><p>Phase IV (FY27) - \$100,000</p></div>

<p>DESCRIPTION / OBJECTIVES</p> <p>There is an old sewer lagoon that was used to treat wastewater from Bassett Walker up until the early 90's. This lagoon is located along the Smith River and is owned by the PSA. It was determined that a fence should be placed around the lagoon for safety concern rather than the expense of closing.</p> <p>At some point in the future it may be more cost effective to build the alum sludge pump station and force main and take the alum lagoon off line.</p> <p>The Koehler headworks are and EQ Basin need modifications to keep solids from accumulating.</p> <p>The basins at the LSR WWTP need to have accumulated solids and vegetation removed and then adequately lined.</p>	<p>GRAPHIC</p> <table style="width:100%;"> <tr> <td>FY26 Bassett Walker Lagoon Fence</td> <td align="right">\$74,000</td> </tr> <tr> <td>*Construct Alum Pump & FM</td> <td align="right">\$2,800,000</td> </tr> <tr><td colspan="2"> </td></tr> <tr> <td>FY27 Koehler Pretreat & EQ Mods</td> <td align="right">\$450,000</td> </tr> <tr><td colspan="2"> </td></tr> <tr> <td>FY28 LSR basin sludge & veg. removal</td> <td align="right">\$350,000</td> </tr> <tr><td colspan="2"> </td></tr> <tr> <td>FY29 Liners for LSR EQ Basins</td> <td align="right">\$1,500,000</td> </tr> <tr><td colspan="2"> </td></tr> <tr> <td>FY30 Koehler EQ Basin Sludge</td> <td align="right">\$75,000</td> </tr> <tr><td colspan="2"> </td></tr> <tr> <td>*Philpott Alum Lagoon Annual Cost</td> <td align="right">\$120,000</td> </tr> <tr> <td>Proposed PS & FM Annual Cost</td> <td align="right">\$32,000</td> </tr> <tr> <td>Proposed Project Cost</td> <td align="right">\$2,600,000</td> </tr> <tr> <td>Payback Period</td> <td align="right">29 Years</td> </tr> </table>	FY26 Bassett Walker Lagoon Fence	\$74,000	*Construct Alum Pump & FM	\$2,800,000			FY27 Koehler Pretreat & EQ Mods	\$450,000			FY28 LSR basin sludge & veg. removal	\$350,000			FY29 Liners for LSR EQ Basins	\$1,500,000			FY30 Koehler EQ Basin Sludge	\$75,000			*Philpott Alum Lagoon Annual Cost	\$120,000	Proposed PS & FM Annual Cost	\$32,000	Proposed Project Cost	\$2,600,000	Payback Period	29 Years

DESCRIPTION / OBJECTIVES			GRAPHIC														
<p>Stand-by power either as generators or dual sources of power are critical to ensure reliable water and sewer service to our customers and PSA facilities during times of power outages.</p> <p>The Stones Dairy booster pumping station has become a necessary part of the water system expansion to 220 South. As such, a generator will be required to maintain system integrity during power outages.</p> <p>A portable generator is necessary as a back-up to existing sites and sites that do not have a generator.</p> <p>The Rangeley SLS generator is 26 years old and at the end of it useful life. The generator has had a number of failures and repairs and needs to be replaced.</p> <p>These prices include the generator, transfer switch, installation, start-up, testing and freight.</p> <p>This will help ensure that the PSA meets VDH water pressure and fire demand and sewer overflow regulations during extended power failures within our service areas.</p>			<p>FY25 Portable Generator Replacement 144 kW \$160,000</p> <p>FY26 57 West BPS Generator Replacement 250kW \$205,000</p> <p>FY27 Replacement Rangeley SLS Generator 50 kW Generator \$80,000</p> <p>FY26 LSR Transfer Switch Replacement</p> <table style="width:100%;"> <tr> <td>Engineering & Design</td> <td align="right">\$ 50,000 (complete)</td> </tr> <tr> <td>Phase I Wiring</td> <td align="right">\$100,000 (complete)</td> </tr> <tr> <td>Phase II Wiring</td> <td align="right">\$450,000 (postpone)</td> </tr> <tr> <td>AEP Installation of ATS</td> <td align="right">\$275,000 (complete)</td> </tr> <tr> <td align="right">Sub-Total</td> <td align="right">\$875,000</td> </tr> <tr> <td align="right">Total</td> <td align="right">\$995,000</td> </tr> </table>			Engineering & Design	\$ 50,000 (complete)	Phase I Wiring	\$100,000 (complete)	Phase II Wiring	\$450,000 (postpone)	AEP Installation of ATS	\$275,000 (complete)	Sub-Total	\$875,000	Total	\$995,000

<p>DESCRIPTION / OBJECTIVES</p> <p>As part of the PSA's objective to provide a redundant source of water to the southern end of Henry County, the 57 West & Stones Dairy Booster Pump Stations will need to be upgraded for increased capacity.</p> <p>The 57 West Booster Pump Station is only able to provide 110,000 gallons per day towards Southern Henry County after meeting current demand. If one of the Carver pump stations fail, the PSA is only able to provide less than 25% of the total demand to CCBC and Southern Henry County</p> <p>The upgrade will include replacing the existing pumps, motors, generator, service entrance, electrical components and controls to the 57 West BPS and possibly increasing pump size to the Stones Dairy BPS.</p>	<p>GRAPHIC</p> <table style="width:100%;"> <tr> <td style="width:10%;">FY25</td> <td style="width:60%;">PER</td> <td style="width:30%; text-align: right;">\$ 25,000</td> </tr> <tr> <td>FY26</td> <td>Engineering & Design</td> <td style="text-align: right;">\$150,000</td> </tr> <tr> <td>FY27</td> <td>Construction</td> <td style="text-align: right;">\$850,000</td> </tr> <tr> <td></td> <td>Construction Admin.</td> <td style="text-align: right;">\$ 85,000</td> </tr> <tr> <td colspan="2" style="text-align: right; padding-right: 20px;">Project Total</td> <td style="text-align: right;">\$1,110,000</td> </tr> </table>	FY25	PER	\$ 25,000	FY26	Engineering & Design	\$150,000	FY27	Construction	\$850,000		Construction Admin.	\$ 85,000	Project Total		\$1,110,000
